Subject: RE: EZ Vent Cover

Hi Greg:

I have reviewed Webster's Third New International Dictionary published by Merriam – Webster Inc.. The word "screen" as a noun has 13 definitions, the most applicable being No. 11 stating " a frame holding a metallic or textile netting used especially in a window or door to exclude insects. As a verb there are eight different definitions, No. 6a stating " to provide with a screen to keep out insects". As an adjective there are three definitions, No. 1 stating " having a screen to keep out insects". None of these definitions could apply to your clothes dryer exhaust vent as is currently manufactured.

Email any questions.

Regards

Barry Haley
