

**Informal Interpretation Report
Number 3339**

Date May 11, 2025

Edition

Section 1106.5

Question:

Is it the intent of 1106.5 to require separate wall penetrations for secondary scuppers when primary drainage is by thru-wall scupper to collection box with aluminum rainwater leaders as primary drainage to grade and with cut-face (overflow) on the collector box?

Notice:

The Building Officials Association of Florida, in cooperation with the Florida Building Commission, the Florida Department of Business & Professional Regulation, ICC, and industry and professional experts offer this interpretation of the Florida Building Code in the interest of consistency in their application statewide. This interpretation is informal, non-binding and subject to acceptance and approval by the local building official.
