

**Informal Interpretation Report  
Number 6810**

**Date** July 22, 2011

**Edition** 2007

**Section** 210.52

**Question:**

Is it the intent of NEC section 210.52 to view kitchen islands and peninsulas that separate kitchens from living areas as both countertops and fixed room dividers?

**Answer:**

Yes. If the divider is over 12 feet, you would start from the edge and install a receptacle, within 6 ft of the edge. If there is still counter wall space after measuring 12 ft from that receptacle then you would install another and so on, otherwise the requirement would be for the one, because the space is 2 ft. or larger.

On 07/22/2011 at 10:27 AM

**Commentary:**

The wall space adjoining / facing the living space must have receptacle outlets installed per 210.52(A), & the countertop side facing the kitchen must have receptacles installed per 210.52(C).
