

**Informal Interpretation Report
Number 7432**

Date December 10, 2014

Edition 2010

Section G2403(202)/G 2420.2 (4)

Question:

The following questions pertain to single family residential homes. 1. Is it the intent of the G 2403(202) Definitions be an enforceable section of the code? 2. Is it the intent of the Residential Code to require a service shutoff valve at the outlet of the serving gas suppliers meter or regulator (customer owned piping) in addition to the service shutoff valve installed at the supply inlet by the serving gas supplier (i.e. the shutoff located at the meter or regulator)?

Answer

1) Definitions are just that, they define a word or group of words to help us all apply the rules, they are not requirements.

2) No, a service shut off valve is not required, in addition to the meter valve.

Commentary:

None

Notice:

The Building Officials Association of Florida, in cooperation with the Florida Building Commission, the Florida Department of Business & Professional Regulation, ICC, and industry and professional experts offer this interpretation of the Florida Building Code in the interest of consistency in their application statewide. This interpretation is informal, non-binding and subject to acceptance and approval by the local building official.
